5. **Are there citations or references?** This indicates that the author has done their research.

Cross-referencing information from multiple reputable sources is always a good practice.

Leveraging Search Operators: Advanced Search Techniques

Search engines offer powerful tools to refine your searches:

1. **Quotation Marks (" "):** To search for an exact phrase (e.g., "climate change solutions").
2. **Minus Sign (-):** To exclude certain words (e.g., "apple -fruit" to search for the company).
3. **site: operator:** To search within a specific website (e.g., "site:nytimes.com artificial intelligence").
