

Head first html and css 2nd edition

tags, you'll grasp the fundamental structure of an HTML file.

1. **Create Basic Text Elements:** Learn to use headings (`<h1>`

`<h2>` to `<h6>`

`<p>`), paragraphs (`<pre>`

`<code>`), and emphasis (`<em>`, `<strong>`) *to organize and present your text effectively.*

2. **Build Lists:** Master ordered lists (`<ol>`

`<ol type="a">`) and unordered lists (`<ul>`

`<li>`) to present information in a clear and structured manner.

1. **Incorporate Images:** Learn how to embed images (`<img>`) into your web pages, controlling their size and alternative text for accessibility.

2. **Create Links:** Understand how to create hyperlinks (`<a>`) to connect different pages within your website or to external resources, a fundamental aspect of web navigation.

3. **Work with Tables:** Learn to use HTML tables (`<table>`
