The Art of Impression Management: Understanding Goffman's Presentation of Self

**** We constantly navigate social interactions, crafting impressions and managing perceptions. Erving Goffman, a renowned sociologist, meticulously examined this intricate process, developing the concept of "presentation of self" - a framework for understanding how individuals strategically manage their public image to achieve desired outcomes in social encounters. Goffman's work, rooted in symbolic interactionism, provides invaluable insights into the complexities of human interaction and the ways we construct our social reality. This delves into the nuances of Goffman's theory, exploring key concepts and implications.**

Understanding the "Dramaturgical" Approach **Goffman's approach to understanding social interaction is often compared to a theatre. He coined the "dramaturgical model," likening social life to a stage where individuals are actors, playing roles and managing their performances. This analogy highlights the strategic nature of social interaction. We carefully select our costumes, scripts, and props to project a particular image. The goal is to ensure our performance aligns with our desired outcome, whether it be making a good first impression, maintaining authority, or fitting into a specific social group.**

- **Impression Management: The core concept of Goffman's theory. It's the conscious or unconscious effort to control the impression others have of us.**
- **Front Stage/Back Stage:** These terms describe the different aspects of our social performances. The front stage is where we perform for the audience, presenting our desired image. The back stage is a private space where we can relax and shed the performative masks. Key Elements of Presentation of Self *Goffman's theory delves into several critical elements of presentation of self:*
- **The Self as a Performance: Goffman argued that the "self" isn't a fixed entity but rather a constructed performance tailored to the specific audience and situation. What we reveal to one person might be drastically different from what we reveal to another.**
- **Impression Management Techniques:** *Individuals employ numerous strategies for managing impressions, including verbal and nonverbal cues, attire, demeanor, and emotional displays. These techniques are designed to influence the audience's perception.*
- **Context Matters: The success of an impression depends heavily on the social context. The persona that works in a professional setting might not be effective in a social gathering. The "performance" will change according to the situation.**
- **The Importance of Props: Physical objects, attire, and even body language can all play crucial roles in crafting our desired image. The choice of props contributes significantly to the intended effect.**
- **Audience Response and Adjustment:** *Goffman emphasized the dynamic interplay between actors and audience. Our performances are not static; we constantly adjust our presentation based on the audience's reactions.*

Beyond the "Theatre" Analogy **Goffman's work transcends the simple theatre analogy. It explores the subtle power dynamics inherent in social interaction.**

Individuals constantly negotiate identities and power relationships through their performances.

- **Power Dynamics:** **The concept of power comes into play, especially as individuals with greater social capital might maintain greater control over the interaction.**
- **Social Stigma and Managing Identities:** *Individuals with stigmatized identities may employ specialized impression management techniques to mitigate the impact of those stigmas.* Examples in Everyday Life **Presentation of self is ubiquitous in daily life. Consider job interviews, first dates, and even mundane encounters at the grocery store. We strive to project specific images in these situations.**
- **Job interviews:** Candidates carefully choose their attire, language, and demeanor to present themselves as qualified and suitable for the position.
- **Social gatherings:** **We curate our conversations, select appropriate topics, and display pleasantries to maintain a positive impression.**
- **Everyday interactions:** *We adjust our body language and tone of voice to convey specific emotions and intentions in our daily routines.*
- Limitations and Criticisms**
- **While insightful, Goffman's theory has faced criticism.**
- **Overemphasis on Conscious Control:** Some argue that Goffman's model might overemphasize conscious control over our presentations, neglecting the significant influence of social structures and unconscious biases.
- **Potential for Stereotyping:** *The emphasis on performances could inadvertently reinforce existing social stereotypes.*

Conclusion

Erving Goffman's concept of presentation of self provides a valuable lens through which to examine the complexities of human interaction. By understanding the various techniques used in impression management, we can better interpret social situations and navigate the intricate dance of social life. The dramaturgical model, while highlighting the conscious and strategic aspects of our interactions, also underscores the dynamic and ever-shifting nature of the self.

Key Takeaways:

- **Social interaction is a performance.**
- **Impression management is key to achieving desired outcomes.**
- **Context plays a significant role in shaping performances.**
- **Individuals strategically manage their appearances.**

Five Insightful FAQs

Ever felt a little... *on* when you're around certain people? Like you're carefully choosing your words, adjusting your posture, and generally projecting a specific image? If so, you've already dipped your toes into the fascinating world of Erving Goffman's "presentation of self." This groundbreaking sociological concept, explored in his seminal work **The Presentation of Self in Everyday Life**, offers a powerful lens through which to understand how we navigate social interactions. It's not just about being fake; it's about the subtle, often unconscious, ways we

manage impressions to fit in, achieve goals, and maintain our social standing.

Goffman, a Canadian-American sociologist, viewed social life as a kind of theatrical performance. He borrowed concepts from dramaturgy – the study of dramatic composition and performance – and applied them to our everyday lives. Think of it like this: we are all actors on a social stage, and our interactions are scenes where we perform roles, using props, costumes, and scripts to convey a particular image of ourselves to others.

The Dramaturgical Approach: Life as a Stage

At the heart of Goffman's theory is the idea that social life is best understood through a dramaturgical lens. This doesn't mean we're all consciously lying or deceiving others. Instead, it suggests that much of our behavior is about managing how others perceive us, a process he called "impression management." We present a particular "face" – our desired self-image – and try to prevent others from seeing any backstage realities that might contradict it.

Front Stage vs. Back Stage: The Performance Continues

Goffman breaks down social settings into two main areas: the front stage and the back stage. This distinction is crucial to understanding how we present ourselves.

The Front Stage: Where the Performance Happens

The front stage is where the performance takes place. This is the public arena where we are aware of being observed and actively manage our impressions. Think about your behavior at a job interview, during a first date, or even when interacting with a cashier at the grocery store. You're likely to be more polished, more articulate, and more aware of social norms. Your clothing, your speech patterns, your body language – all are carefully chosen to project a certain image. For example, when presenting a business proposal, you'll dress professionally, speak with confidence, and highlight your strengths, aiming to impress potential clients or superiors.

Goffman observed that on the front stage, individuals are concerned with maintaining a consistent "line" of behavior. This "line" is a pattern of verbal and nonverbal acts by which an individual expresses his view of the situation and of the participants. We try to ensure that our actions align with the role we are playing and the image we want to project. If you're playing the role of a helpful friend, your actions on the front stage will be supportive and attentive.

The Back Stage: Where the Mask Comes Off

The back stage, in contrast, is where individuals can relax, drop the performance, and be their "true" selves, or at least a less guarded version of themselves. This is a private space where the rules of the front stage are suspended. Think of the break room at work, your home with close family, or even your car during a solo commute. Here, you might sigh with relief, complain about your boss, or engage in behaviors that wouldn't be appropriate in public. The back stage allows us to prepare for our next front stage performance, to shed the persona, and to refresh ourselves before stepping back into the social spotlight.

The back stage is crucial for maintaining the front stage performance. It's where we can process our experiences, strategize, and get ready for our next act. Without a backstage, the constant pressure of performance would be unsustainable. It's also where we can reveal aspects of ourselves that might be considered less desirable or that could undermine our front stage persona. For instance, a waiter might complain about demanding customers in the back kitchen, away from the patrons' ears.

Performance and Social Roles: The Scripts We Follow

Goffman's dramaturgical analogy highlights the importance of social roles. We all play numerous roles throughout our lives: student, parent, friend, employee, customer, and so on. Each role comes with a set of expectations and norms that guide our behavior. When we perform these roles, we are, in essence, acting out a script that society has provided.

The key is that these roles are not rigid. We have a degree of agency in how we interpret and enact them. However, there's always pressure to conform to the general expectations associated with a role. For example, while there are many ways to be a "good friend," certain core behaviors are generally expected, like loyalty and support. Deviating too far from these expectations can lead to social sanctions or a loss of social standing.

Impression Management: The Art of Shaping Perception

Impression management is the conscious or subconscious process by which people attempt to influence the perceptions of other people about a person, object, or event. It's about controlling the information that others receive about us to create a favorable impression. This involves a range of techniques:

Verbal and Nonverbal Cues: The Tools of the Trade

We use both verbal and nonverbal cues to manage impressions. Our words, tone of voice, facial expressions, gestures, posture, and even the clothes we wear all contribute to the image we project. For example, making direct eye contact and nodding while someone is speaking can convey attentiveness and respect. Conversely, fidgeting and avoiding eye contact might suggest nervousness or disinterest.

Setting and Appearance: The Stage and the Costume

Goffman also emphasized the importance of "setting" and "appearance." The setting refers to the physical environment in which an interaction takes place, and appearance refers to how we present ourselves physically. A doctor's office, with its sterile environment and the doctor's white coat, immediately conveys authority and professionalism. Similarly, dressing in a suit for a job interview signals seriousness and competence.

. . . And the Tools We Use: Props and Personal Front

Beyond setting and appearance, we also utilize "props" – objects that help us project a certain image – and our "personal front." Personal front includes our manner (how we behave), our

appearance (what we wear), and our use of props. Think of a lawyer carrying a briefcase, a student with a stack of textbooks, or a chef with their chef's hat and apron. These are all props that reinforce their respective roles and the impressions they wish to convey.

The Social Construction of Reality: We Create Our World

Goffman's work strongly supports the sociological concept of the social construction of reality. This idea suggests that our understanding of the world and our place in it is not inherently fixed but is shaped by our social interactions and shared meanings. Through our daily performances and impression management, we actively contribute to building and maintaining the social realities we experience.

The Role of Interaction Rituals: Maintaining Social Order

Goffman also explored the concept of "interaction rituals" – established patterns of social behavior that serve to reinforce social bonds and maintain social order. These are the seemingly small, everyday rituals, like greetings, farewells, and expressions of gratitude, that help smooth social interactions and reaffirm shared norms and values.

When we participate in these rituals, we are engaging in a form of social currency. For example, a sincere "thank you" or a polite "excuse me" can generate positive feelings and reinforce our connection with others. These rituals, though often taken for granted, are vital for the ongoing functioning of society. They are the micro-level mechanisms that uphold the macro-level social structure.

Deviance and Social Control: When the Performance Falters

Goffman's framework also sheds light on deviance and social control. When individuals fail to perform their roles adequately, or when their backstage realities become too apparent, they risk social sanctions. This can range from subtle disapproval to more formal forms of social control, such as ostracization or even legal punishment.

Stigma and the Spoiled Identity: When the Mask is Seen Through

A particularly poignant concept in Goffman's work is "stigma." Stigma refers to a deeply discrediting characteristic, attribute, or label that precedes or follows an individual and marks them as different and undesirable in the eyes of others. Stigma can be physical (like a disability), social (like a criminal record), or personal (like a mental illness). Individuals who are stigmatized often face social exclusion and discrimination because their "spoiled identity" contradicts the expected norms of the social group.

The impact of stigma is profound, as it can lead to a sense of shame, isolation, and a damaged

self-concept. Goffman argued that individuals with stigmatized identities often engage in various strategies to manage their discredited status, such as passing (concealing their stigma) or covering (minimizing its significance).

Everyday Examples of Presentation of Self

You see Goffman's ideas at play everywhere:

1. **Social Media:** Platforms like Instagram and Facebook are quintessential front stages. We curate our profiles, share carefully selected photos and updates, and craft narratives that present an idealized version of ourselves. The carefully filtered photos, the witty captions, the highlight reels of our lives – these are all tools of impression management. The "backstage" is often hidden, a contrast to the polished online persona.
2. **Job Interviews:** As mentioned before, this is a classic front stage. Dressing smartly, preparing answers to common questions, and projecting confidence are all part of the performance to impress the interviewer and secure the job.
3. **First Dates:** On a first date, both individuals are performing. They want to make a good impression, so they might be more charming, more agreeable, and more eager to please. The conversation is often steered towards common interests and positive topics.
4. **Customer Service Interactions:** Retail workers, waiters, and call center agents are trained to maintain a specific demeanor – friendly, helpful, and professional – regardless of their personal feelings. This is a clear example of front stage performance.
5. **Family Gatherings:** While often considered a more relaxed setting, even family gatherings can involve front and back stage dynamics. You might put on a cheerful face for your grandparents, while privately complaining to your siblings about a relative's annoying habit.

Beyond the Performance: The Importance of Authenticity

While Goffman's dramaturgical perspective offers invaluable insights, it's important to remember that it's a theoretical framework. Our social lives are not solely about performance. Authenticity, genuine connection, and vulnerability are also vital components of human relationships. The tension between presenting a desired self and being our true selves is a fundamental aspect of the human experience.

Understanding Goffman's presentation of self allows us to be more aware of the social dynamics at play in our lives. It helps us critically analyze the performances we and others engage in, and to better navigate the complexities of social interaction. It's a reminder that while we are all actors on life's stage, the most meaningful connections often arise when we can find moments of genuine backstage connection and allow our true selves to shine through, even on the front stage.

The Presentation of Self in Everyday Life: Exploring Erving Goffman's Groundbreaking Theory
Erving Goffman's concept of the presentation of self remains one of the most influential frameworks in sociology and social psychology, offering profound insight into how individuals

manage impressions and construct identity in social interactions. Published in 1959, his seminal work reconceptualized human behavior not as a passive unfolding of inner traits, but as a dynamic, performative act shaped by context, audience, and social norms. At its core, Goffman's theory challenges the notion of a fixed, authentic self, proposing instead that identity is fluid and carefully curated through strategic performances in everyday life.

Understanding the Dramaturgical Perspective

Goffman's most vivid metaphor compares social interaction to a theatrical performance, where individuals are both actors and audiences engaged in managing impressions. He introduced the idea that people operate within a stage-like setting, using front stages and back stages to regulate how they are perceived. The front stage is where performance is carefully managed—gestures, words, and appearance aligned with social expectations—while the back stage offers privacy and the space to prepare, recover, or shed roles. This dramaturgical model illuminates how people adapt their behavior depending on context: a professional in a boardroom, a friend in casual conversation, or a parent at a school event—all are navigating distinct roles with deliberate presentation strategies. Central to this performance is the concept of “face,” a term Goffman borrowed from sociolinguistics to describe the public self-image individuals strive to maintain. Preserving face involves both protecting one's own image and respecting others' dignity, requiring constant negotiation. Mismanagement—such as a public blunder or unmet expectation—can threaten face for both parties, prompting strategies like apology, deflection, or face-saving gestures. Through this lens, social life becomes a continuous process of impression management, where authenticity is less about inner truth and more about effective performativity.

Key Insights and Social Applications

Goffman's framework has deeply influenced how scholars and practitioners understand identity, interaction, and social order. One key insight is that social roles are not rigid scripts but flexible performances shaped by improvisation and audience feedback. This perspective highlights cultural variability—what counts as appropriate presentation differs across societies and subcultures, revealing the socially constructed nature of behavior. For instance, formal etiquette in Japanese business culture contrasts sharply with the directness valued in Scandinavian workplace interactions, both reflecting distinct dramaturgical norms. Beyond theory, Goffman's ideas have practical applications across multiple fields. In education, teachers and students engage in ongoing performances that affect learning dynamics and classroom atmosphere. In healthcare, patients and providers negotiate identities—where patients may present vulnerability while professionals manage authority—shaping outcomes through mutual impression management. In digital spaces, the dramaturgical model extends powerfully: social media profiles, avatars, and curated content exemplify modern self-presentation, where digital personas are crafted for visibility, validation, and connection.

The presentation of self in everyday life, as Goffman revealed, underscores the active, strategic, and context-dependent nature of human identity. Rather than hiding behind a mask, individuals engage in sophisticated performances that balance authenticity with social

constraint. This understanding invites greater empathy for the complexities of social interaction and opens pathways for more intentional self-representation in both personal and professional realms. Looking forward, Goffman's legacy continues to resonate in an increasingly mediated world. As virtual and augmented realities expand the stages of interaction, his dramaturgical insights offer a vital lens to navigate identity, privacy, and authenticity. The ongoing evolution of communication technologies prompts renewed inquiry into how impression management adapts—ensuring Goffman's work remains not just relevant, but essential to understanding the human condition in a performance-saturated society.

The Presentation of Self in Everyday Life: Goffman's Enduring Lens on Social Interaction

In the complex theatre of human existence, we are all actors, constantly performing for an audience. This fundamental insight forms the cornerstone of Erving Goffman's seminal work, "The Presentation of Self in Everyday Life." Published in 1959, this sociological masterpiece offers a profound and enduring framework for understanding how individuals construct and manage their identities through social interaction. Goffman's dramaturgical approach, borrowing heavily from the world of theatre, provides a powerful lens through which to analyze the seemingly mundane acts of our daily lives, revealing the intricate choreography of impression management and social performance that shapes our perceptions and relationships.

At its core, Goffman's theory posits that social life is akin to a stage where individuals engage in a continuous process of "giving and giving off" information about themselves. We strive to present a particular impression to others, an image that we believe will be favorably received. This impression is not necessarily a reflection of our true inner selves, but rather a carefully curated persona designed to navigate the social landscape. Understanding **Goffman's presentation of self** is crucial for anyone seeking to grasp the mechanics of social interaction, the construction of social roles, and the very essence of social order.

The Dramaturgical Perspective: Life as a Stage

Goffman's central metaphor is that of the theatre. He argues that individuals, like actors, adopt specific roles and employ a range of techniques to manage the impressions they create. This involves understanding the concepts of "front stage" and "back stage" behavior. The front stage is where performances take place, where we are conscious of being observed and actively work to uphold a particular image. Think of a waiter interacting with customers in a restaurant – they are on the front stage, exuding professionalism and attentiveness. The back stage, conversely, is where individuals can relax, drop their performance, and be their more private selves. The same waiter, in the kitchen or in their own home, might be less formal, complaining about demanding customers or simply unwinding.

This distinction is vital because it highlights the performative nature of much of our social interaction. We are not simply acting spontaneously; we are actively engaged in a process of

"impression management." This involves a constant interplay of verbal and nonverbal cues. Our clothing, our language, our body language, our tone of voice – all are tools used to convey a desired image. For instance, a job interview is a classic example of a front-stage performance, where an applicant meticulously crafts their presentation to impress the interviewer and secure employment.

Impression Management: The Art of Controlling Perceptions

Impression management is the key mechanism through which individuals present themselves. It's the conscious or unconscious effort to influence the perceptions that others form of us. Goffman identifies several key techniques involved in this process:

1. **Conformity to social norms:** Adhering to expected behaviors and etiquette within a given social context is a primary way of projecting a socially acceptable self.
2. **Self-disclosure:** Strategically revealing certain aspects of ourselves to others to shape their understanding. This can range from sharing personal anecdotes to highlighting achievements.
3. **Appearance management:** Our clothing, grooming, and overall physical presentation play a significant role in how we are perceived. A tailored suit, for example, often signals professionalism and competence.
4. **Setting management:** The physical environment we inhabit or choose to display also contributes to our self-presentation. A meticulously organized office can project an image of efficiency, while a cluttered workspace might suggest disorganization.
5. **Verbal and Nonverbal Cues:** The words we choose, our tone of voice, facial expressions, and gestures all contribute to the overall impression we create.

Goffman's analysis of impression management is remarkably nuanced. He acknowledges that individuals are not simply passive recipients of social expectations. Instead, they actively engage in a dynamic process of negotiation and adaptation, constantly adjusting their performances based on the reactions of their audience. This concept is closely related to the idea of "face-work," where individuals strive to maintain their social standing and avoid embarrassment or shame.

Front Stage and Back Stage: The Dual Lives We Lead

The bifurcation of social life into front and back stages is central to Goffman's theory. The **front stage** is characterized by the need for control and polish. Here, individuals are mindful of the audience and strive to present a consistent and desirable image. This is where we encounter the "role" we are expected to play. For example, a teacher in a classroom is on the front stage, embodying the role of educator, delivering lessons, and managing student behavior.

The **back stage**, in contrast, is a space of respite and authenticity. It's where the mask can be dropped, and individuals can engage in behaviors that would be inappropriate on the front stage. This could involve venting frustrations, practicing a performance, or simply relaxing. The back stage is crucial for maintaining the integrity of the front-stage performance. Without

the opportunity to shed the persona, the constant performance would be unsustainable and lead to burnout.

Consider the example of a politician. On the front stage, they deliver polished speeches, engage in carefully choreographed public appearances, and project an image of confidence and decisiveness. In the back stage, however, they may be engaged in intense strategizing, dealing with personal anxieties, or having candid, unfiltered conversations with their staff. The back stage allows them to prepare for and recover from their front-stage duties.

Social Roles and Their Performance

Goffman's work emphasizes that society is structured around a series of social roles. These roles come with a set of expectations, norms, and behaviors that individuals are expected to embody. Whether it's the role of parent, employee, friend, or student, each role demands a particular performance. The "presentation of self" then becomes the act of fulfilling these role expectations.

However, Goffman also recognized that individuals can be "committed" or "uncommitted" to their roles. Some individuals fully embrace and internalize their roles, while others may perform them more cynically or performatively, seeing them as a means to an end. This highlights the agency individuals have in how they inhabit their social roles.

The concept of "role distance" is also relevant here. It refers to the degree to which an individual separates themselves from the role they are performing. A child playing doctor might exhibit high role distance, knowing they are not a real doctor. An adult in a mundane job might also exhibit role distance, performing their duties without necessarily identifying with the intrinsic value of the work itself.

Face-Work: Maintaining Social Dignity

A critical component of Goffman's theory is the concept of "face-work." This refers to the actions individuals take to maintain their own social image and to save the face of others. When our presented self is threatened or challenged, we engage in face-work to restore equilibrium.

This can involve a variety of tactics, such as:

1. **Denial:** Denying any wrongdoing or responsibility.
2. **Evasion:** Changing the subject or avoiding the issue.
3. **Explanation:** Offering justifications or excuses.
4. **Apology:** Expressing regret for one's actions.
5. **Appeasement:** Making amends or offering compensation.

Face-work is a continuous process that underpins social interaction. It's about preserving social harmony and ensuring that individuals can navigate social situations without undue embarrassment or conflict. A simple example is when someone trips; bystanders might quickly look away or offer assistance, both actions aimed at saving the embarrassed individual's face.

The Relevance of Goffman's Presentation of Self Today

Despite being published over six decades ago, Goffman's "The Presentation of Self in Everyday Life" remains remarkably relevant in our contemporary world, especially in the age of social media. Platforms like Facebook, Instagram, and TikTok have amplified the performative aspects of our lives. Individuals curate their online personas with meticulous care, presenting idealized versions of themselves for public consumption.

The digital realm offers new stages for performance, blurring the lines between front and back stage in unprecedented ways. What was once a private moment can now be instantly shared with a global audience. The constant pressure to present a perfect, enviable life online underscores Goffman's insights into impression management and the relentless pursuit of social validation. The curated vacation photos, the carefully crafted captions, and the strategic use of filters are all forms of self-presentation designed to elicit positive reactions and maintain a desirable online image.

Furthermore, Goffman's work offers valuable insights into fields beyond sociology, including psychology, communication studies, and even marketing. Understanding how people present themselves helps us comprehend consumer behavior, political rhetoric, and interpersonal relationships. The principles of impression management are actively employed in advertising and public relations to shape public opinion and brand perception.

Conclusion: A Timeless Framework for Understanding Ourselves and Others

Erving Goffman's "The Presentation of Self in Everyday Life" provides a powerful and enduring framework for analyzing the intricate ways in which we construct and manage our identities in the social world. His dramaturgical perspective, with its emphasis on front and back stages, impression management, and face-work, offers a compelling explanation for the seemingly effortless choreography of our daily interactions. By viewing social life as a stage, Goffman reveals the hidden labor involved in maintaining our social selves and navigating the complex dynamics of human connection. In a world increasingly dominated by curated online personas and performative identities, Goffman's insights are not just relevant; they are indispensable for understanding the fundamental nature of social interaction and the construction of reality itself.

Questions & Answers About presentation of self erving goffman

No	Question	Answer
1	What's the core idea behind Erving Goffman's 'presentation of self'?	Goffman's 'presentation of self' suggests we act like actors on a stage, managing how others perceive us by presenting a curated 'front' or persona to fit social situations.
2	How does Goffman's dramaturgy relate to everyday social interactions?	Dramaturgy views social life as a performance. We have different 'roles' and 'scripts' for different audiences, constantly adjusting our behavior, language, and appearance to achieve desired impressions.
3	What's the difference between the 'front stage' and the 'back stage' in Goffman's theory?	The 'front stage' is where we perform for others, adhering to social norms and expectations. The 'back stage' is where we can relax, drop our persona, and prepare for future performances.

4	Can you give an example of 'impression management' in action?	Sure. When going for a job interview, you'll dress professionally, speak articulately, and emphasize your strengths – all to create a positive impression of competence and suitability for the role.
5	How do social media platforms fit into Goffman's 'presentation of self'?	Social media is a prime example of front stage performance. We carefully select what to share, how to present ourselves, and curate our online persona to gain likes, followers, and social approval.
6	What are 'props' and 'costumes' in the context of Goffman's theory?	Props are objects we use to support our performance (e.g., a briefcase for a business person), while costumes are our attire, which signals our social role and status to others.
7	Does Goffman believe our 'presentations of self' are always fake?	Not necessarily. While we manage impressions, Goffman suggests these performances become ingrained and can shape our genuine selves. It's a complex interplay between acting and authenticity.
8	What are the implications of Goffman's 'presentation of self' for understanding social inequality?	It highlights how dominant groups can use their 'presentations of self' to maintain power and privilege, while marginalized groups may struggle to adopt presentations that are accepted or valued by society.
