Uh Oh! Paint Splatter on Your Carpet? Here's How to Tackle That Mess

We've all been there. A moment of DIY enthusiasm, a creative burst, or maybe just a clumsy spill, and suddenly – splat! – a streak of paint lands squarely on your beloved carpet. The panic can set in quickly. Is it ruined? Will that colorful stain become a permanent, unwelcome guest? Take a deep breath, because while it might seem daunting, getting paint out of carpet is often a salvageable situation. This comprehensive guide will walk you through the best methods, from fresh spills to stubborn dried-on disasters, ensuring your carpet can be as good as new.

The key to success lies in acting fast and choosing the right approach for the type of paint and how long it's been there. We'll cover everything you need to know, so let's dive in and banish those paint stains for good!

Fresh Paint Spills: Your First Line of Defense

The moment you notice a fresh paint spill, your primary goal is to prevent it from spreading and setting deeper into the carpet fibers. Speed is your best friend here!

Immediate Blotting is Crucial

Don't rub! Rubbing will push the paint further into the carpet pile, making it much harder to remove. Instead, grab a clean, white cloth or paper towels and gently blot the spill. Start from the outside of the stain and work your way inwards to avoid spreading the paint. Continue blotting with fresh sections of the cloth until no more paint is transferring.

Water-Based Paints (Latex, Acrylic, Watercolor) - The Easiest Wins

If you're dealing with water-based paints, you're in luck. These are generally the easiest to remove, especially if caught quickly.

1. **Warm Water and Dish Soap:** Mix a few drops of mild dish soap (like Dawn) with warm water. Dampen a clean cloth with this solution and gently blot the paint stain.
2. **Rinse and Blot:** Once the paint starts to lift, rinse the area with a clean cloth dampened with plain water. Blot dry thoroughly.
3. **Repeat if Necessary:** For more stubborn wet water-based paint, you might need to repeat the dish soap and water blotting process a few times.

Oil-Based Paints (Enamel, Alkyd) - A Little More Effort Required

Oil-based paints are trickier because they don't mix with water. You'll need a solvent to break them down.

1. **Mineral Spirits or Paint Thinner:** These are your go-to solvents for oil-based paint. However, ****test in an inconspicuous area first**** to ensure they don't damage or discolor your carpet.
2. **Apply to Cloth, Not Carpet:** Never pour solvents directly onto the

carpet. Instead, dampen a clean cloth with the solvent and gently blot the paint stain.

3. **Work Slowly:** Be patient. You'll need to blot repeatedly, using fresh sections of the cloth as the paint transfers.
4. **Ventilation is Key:** Ensure the area is well-ventilated when using these strong chemicals.
5. **Clean Up Afterwards:** Once the paint is removed, clean the area with a mild soap and water solution to remove any residual solvent, then blot dry.

Dried Paint: The Bigger Challenge, But Still Doable

Dried paint is where things get a bit more serious. The longer the paint has been on the carpet, the harder it will be to remove. But don't despair! There are several effective methods to tackle these stubborn stains.

Assess the Paint Type

Just like with fresh spills, identifying whether the dried paint is water-based or oil-based is your first step. This will dictate the best removal method.

For Dried Water-Based Paints

Dried latex or acrylic paint can often be softened and lifted with a bit of patience and the right cleaning agents.

Method 1: Warm Water and Detergent (Again!)

This might seem too simple for dried paint, but it's worth a try, especially if it's not too old.

1. **Saturate:** Dampen a clean cloth with warm water and a generous

amount of mild dish soap or laundry detergent.

2. **Soak:** Gently press the damp cloth onto the dried paint stain and let it sit for at least 15-30 minutes to help soften the paint.
3. **Scrape Gently:** Use a dull knife or a spoon to gently scrape away the softened paint. Avoid sharp objects that could damage carpet fibers.
4. **Blot and Repeat:** Blot the area with a clean, dry cloth. If paint is still present, repeat the soaking and scraping process.
5. **Rinse and Dry:** Once the paint is removed, rinse the area with a clean, damp cloth and blot thoroughly with a dry towel.

Method 2: Rubbing Alcohol (Isopropyl Alcohol)

Rubbing alcohol can be surprisingly effective at breaking down dried latex and acrylic paints.

1. **Test First:** As always, test rubbing alcohol in an inconspicuous spot to check for colorfastness.
2. **Apply to Cloth:** Dampen a clean cloth with rubbing alcohol.
3. **Blot and Work:** Gently blot the dried paint stain. You may need to use a bit of friction, but be careful not to damage the fibers.
4. **Scrape and Repeat:** As the paint softens, use a dull scraper to lift it away. Continue blotting and scraping until the stain is gone.
5. **Rinse and Dry:** Rinse with a clean, damp cloth and blot dry.

Method 3: Commercial Carpet Stain Removers

There are many carpet cleaners specifically designed for paint stains. Look for one that is suitable for your carpet type and the type of paint.

1. **Follow Instructions Carefully:** Always read and follow the manufacturer's instructions precisely.
2. **Test First:** Even commercial products should be tested in a hidden area.
3. **Apply and Blot:** Apply the cleaner as directed and blot the stain.
4. **Rinse Thoroughly:** Ensure you rinse out all residue to prevent

attracting dirt later.

For Dried Oil-Based Paints

Dried oil-based paint requires stronger solvents. Again, caution and testing are paramount.

Method 1: Mineral Spirits or Paint Thinner (With Extreme Caution)

This is the most effective method for dried oil-based paint, but it requires the most care.

1. **Ventilation is Non-Negotiable:** Open windows and doors to ensure maximum airflow.
2. **Protect Surrounding Areas:** You might want to place a barrier around the stained area to prevent accidental spills.
3. **Apply to Cloth:** Dampen a clean, white cloth with mineral spirits or paint thinner. Do NOT pour directly onto the carpet.
4. **Blot and Scrape:** Gently blot the dried paint. As it softens, use a dull knife or spatula to carefully scrape away the loosened paint. Work in small sections.
5. **Be Patient:** This process can take time and multiple applications. Keep blotting and scraping.
6. **Clean with Soap and Water:** Once the paint is gone, you'll need to remove the solvent residue. Mix a few drops of mild dish soap with water and gently blot the area.
7. **Rinse and Dry:** Rinse thoroughly with a clean, damp cloth and blot dry with a clean towel.

Method 2: Glycerin (A Gentler Option for Some Oil-Based Paints)

Glycerin can sometimes help soften and lift dried oil-based paint, offering a less harsh alternative to solvents.

1. **Apply Glycerin:** Apply a small amount of glycerin directly to the dried

paint stain.

2. **Let it Sit:** Allow it to sit for at least 30 minutes to an hour to soften the paint.
3. **Scrape and Blot:** Gently scrape away the softened paint and blot the area with a clean cloth.
4. **Clean and Rinse:** Clean the area with a mild soap and water solution, then rinse and blot dry.

Special Considerations for Different Carpet Types

Not all carpets are created equal. The material of your carpet can influence how you approach paint removal.

Natural Fibers (Wool, Cotton)

These are more delicate. Avoid harsh chemicals and excessive scrubbing. Test any cleaning solution in an inconspicuous area first. For wool carpets, opt for pH-neutral cleaners. Be very gentle when scraping.

Synthetic Fibers (Nylon, Polyester, Olefin)

These are generally more durable and can withstand a wider range of cleaning solutions. However, always test first. Solvents might be more effective here, but still use them with caution.

Important Tips for All Carpet Types:

1. **Always Test First:** This cannot be stressed enough! Before applying any cleaning solution or solvent to your visible stain, test it on a small, hidden area of the carpet (like inside a closet or under a piece of furniture). This will ensure it doesn't cause discoloration or damage.

2. **Use White Cloths:** Always use white cloths or paper towels. This way, you can see how much paint is transferring and you won't risk transferring dye from a colored cloth to your carpet.
3. **Work from the Outside In:** This is crucial for preventing the stain from spreading.
4. **Don't Oversaturate:** Too much liquid can damage the carpet backing and subfloor, leading to mold or mildew issues.
5. **Blot, Don't Rub:** We've said it before, and we'll say it again. Rubbing embeds the stain.
6. **Patience is a Virtue:** Especially with dried paint, you'll likely need to repeat steps and work slowly and methodically.

When to Call in the Professionals

While many paint stains can be tackled with DIY methods, there are times when it's best to call in the experts:

1. **Large or Significant Spills:** If you've had a major paint spill that covers a large area, professional carpet cleaners have the equipment and expertise to handle it.
2. **Valuable or Delicate Carpets:** If you have antique, hand-knotted, or very expensive carpets, it's wise to let professionals manage the stain removal to avoid causing irreversible damage.
3. **Stubborn or Old Stains:** If you've tried multiple methods and the paint stain is still stubbornly clinging to your carpet, professionals may have access to stronger, specialized cleaning agents.
4. **You're Unsure About the Paint Type or Carpet Material:** If you're unsure about what type of paint you're dealing with or how to safely clean your specific carpet, a professional can offer the best course of action.

Preventing Future Paint Mishaps

While we can't always prevent accidents, here are a few tips to minimize the risk of paint stains on your carpet:

1. **Lay Down Drop Cloths:** This is the most obvious and effective preventative measure. Extend them generously around your painting area.
2. **Wear Old Clothes:** Always wear old, paint-splatter-friendly clothing when painting.
3. **Use Paint Trays with Liners:** These make cleanup much easier.
4. **Secure Paint Cans:** Make sure paint cans are stable and won't easily tip over.
5. **Keep a "Paint Spill Kit" Handy:** Having cloths, paper towels, and your chosen cleaning solution readily available can make a huge difference in the event of a spill.

Getting paint out of carpet can be a daunting task, but with the right knowledge and a bit of effort, you can often rescue your floors from colorful mishaps. Remember to act quickly, identify your paint type, test your cleaning solutions, and be patient. Happy cleaning!

Getting paint out of carpet can be a frustrating yet common challenge, especially in homes, offices, or rental spaces where spills are inevitable. Whether it's a child's art project gone wrong or a craft supply mishap, timely and effective removal is essential to prevent permanent discoloration and stains. Understanding how paint interacts with carpet fibers is the first step toward successful cleaning, as paint composition—whether oil-based, latex, or acrylic—determines the most suitable approach for extraction. Paint adheres to carpets through a combination of surface tension, fiber absorption, and chemical bonding. Once dried, paint hardens, making removal increasingly difficult. Oil-based paints, rich in solvents, can seep deep into nap fibers, while latex and

water-based paints tend to form a sticky film on the surface that bonds firmly as they dry. Recognizing the type of paint involved is crucial, as using the wrong cleaning method can worsen the stain or damage the carpet's texture and color. The first key insight in effective paint removal is acting quickly—ideally within minutes of the spill—before the paint fully sets. Prompt intervention allows for gentle mechanical action and targeted chemical treatment without aggressive scrubbing, which risks matting or weakening the pile. Begin by blotting, never rubbing, the affected area with a clean, dry cloth or paper towel to absorb as much fresh paint as possible. This reduces the amount needing further treatment and prevents the stain from embedding deeper. For fresh latex paint, cold water can be surprisingly effective when applied carefully—though caution is advised with oil-based varieties, which repel water and may require solvent-based solutions. Using a soft-bristled brush or a stain-removing tool, gently lift the surface paint, then apply a carpet-safe paint remover or a mixture of mild dish soap and cool water. Gently blot the area, working from the edges inward to avoid spreading the stain. The goal is to dissolve the paint without disturbing the underlying fibers. In more stubborn cases, especially with dried or oil-based paint, specialized enzymatic or solvent-based cleaners offer superior results. These products target the molecular structure of paint, breaking it down without harsh abrasion. Always follow product instructions carefully, test on a hidden area first, and ensure proper ventilation to avoid lingering fumes. After treatment, blot repeatedly with a clean cloth until no residue remains, then blot dry with a well-ventilated area or a low-heat drying setting. The benefits of proper paint removal extend beyond aesthetics. Prompt cleaning prevents permanent discoloration, preserves carpet lifespan, and avoids costly replacements. For rental properties or shared spaces, this also safeguards property value and tenant satisfaction. Beyond immediate cleanup, understanding paint chemistry empowers users to prevent future incidents—storing supplies properly, using protective covers, or selecting removable paint types can reduce risks significantly. Looking ahead, advancements in eco-friendly cleaning solutions and enzyme-based formulations promise more effective,

sustainable ways to tackle tough stains. As smart cleaning technologies evolve, integrated tools may soon combine precision application, real-time stain analysis, and biodegradable formulations to simplify the removal process. For now, combining knowledge of paint types with gentle, informed cleaning remains the most reliable path to restoring carpet integrity. Ultimately, mastering the art of removing paint from carpet relies on patience, precision, and informed technique. Whether through immediate action, targeted products, or preventive habits, effective stain removal protects both the fabric and the space it inhabits—ensuring clean, welcoming environments for years to come.

How to Get Paint Out of Carpet: A Comprehensive Guide

Paint spills on carpet can be a homeowner's nightmare. Whether it's a rogue splash from a DIY project, a playful pet with muddy paws dipped in paint, or an accidental topple of a paint can, the sight of colorful stains on your once-pristine flooring can induce panic. But fear not! With the right approach and a bit of elbow grease, most paint stains can be successfully removed from your carpet. This detailed, analytical guide will walk you through the most effective methods, from immediate action to tackling stubborn, dried-on paint. We'll cover different paint types, essential supplies, and preventive measures, ensuring you're equipped to handle any paint-related carpet catastrophe.

Understanding the Enemy: Types of Paint and Their Impact on Carpet

The key to successful paint removal lies in identifying the type of paint you're dealing with. Different paint formulations have varying compositions, which dictate their solubility and how they adhere to carpet fibers.

Water-Based Paints (Latex, Acrylic, Emulsion)

These are the most common types of interior paints and, thankfully, the easiest to remove. Their primary solvent is water, meaning they are water-soluble, especially when fresh.

When Wet: The Golden Hour for Water-Based Paint

If you catch a water-based paint spill while it's still wet, you have a significant advantage. The paint hasn't had time to penetrate deeply into the carpet fibers or begin the drying and curing process. Acting swiftly is paramount.

When Dry: The Challenge of Dried Latex and Acrylic

Once water-based paint dries, it becomes a much tougher adversary. The pigments bind together, and the acrylic or latex binders create a film that adheres firmly to the carpet. However, with the right techniques and patience, these can still be removed.

Oil-Based Paints (Alkyd, Enamel)

Oil-based paints, often used for trim, doors, and furniture, are significantly more challenging to remove from carpet. They rely on solvents like mineral

spirits or turpentine for thinning and cleanup. These solvents can also be effective at breaking down the paint, but they require careful handling due to their flammability and fumes.

The Toughness of Oil-Based Stains

Oil-based paints create a more durable and stubborn stain on carpet. Their inherent greasiness means they can penetrate deeper into the fibers, and their solvent-based nature requires specific cleaning agents that can dissolve them without damaging the carpet.

Specialty Paints

This category includes paints like spray paint, fabric paints, and craft paints. Each has its unique composition and may require specialized removal techniques. Spray paint, in particular, can be notoriously difficult due to its fine mist and quick-drying nature.

Essential Supplies for Paint Removal

Before you begin tackling a paint stain, gather your arsenal of cleaning supplies. Having everything on hand will streamline the process and prevent you from spreading the stain further.

1. **Clean, White Cloths or Paper Towels:** Crucial for blotting and absorbing. White is best to avoid color transfer.
2. **Bucket:** For mixing cleaning solutions.
3. **Spoon or Dull Knife:** For scraping up excess wet paint.
4. **Spray Bottle:** For applying cleaning solutions evenly.
5. **Warm Water:** A gentle yet effective cleaning agent.
6. **Mild Dish Soap:** A good degreaser for many types of paint.
7. **Rubbing Alcohol (Isopropyl Alcohol):** Effective for many water-based paints and some oil-based paints.
8. **Mineral Spirits or Turpentine:** For oil-based paint removal (use with

caution and good ventilation).

9. **Commercial Carpet Stain Remover:** Choose one specifically designed for paint stains if possible.
10. **Vacuum Cleaner:** To remove loosened paint particles and debris.
11. **Fan:** For ventilation, especially when using solvents.
12. **Gloves:** To protect your hands from cleaning solutions and solvents.
13. **Scrub Brush (soft bristle):** For gently working cleaning solutions into the carpet fibers.

The Step-by-Step Guide: Tackling Wet Paint Stains

When paint meets carpet, immediate action is your greatest ally. The faster you respond, the higher your chances of a complete stain-free recovery.

Step 1: Blot, Don't Rub!

This is the golden rule of stain removal, especially for wet paint. Grab your clean, white cloths or paper towels and gently blot the spill, working from the outside in. This action absorbs the excess paint without pushing it deeper into the carpet fibers or spreading it further. Continue blotting with fresh sections of the cloth until no more paint is transferring.

Step 2: Scrape Away Excess

For thicker spills, use a spoon or a dull knife to carefully scoop up as much of the wet paint as possible. Again, be gentle to avoid damaging the carpet fibers.

Step 3: Water-Based Paint - The Gentle Approach

* **Mix a Solution:** In a bucket, combine one cup of warm water with a teaspoon of mild dish soap. * **Apply and Blot:** Dampen a clean cloth with the soapy water and gently blot the stained area. You should see some of the paint lifting. * **Rinse:** Dampen another clean cloth with plain warm water and blot the area to rinse out the soap. * **Dry:** Blot the area with a dry cloth and then allow it to air dry completely. You can place a fan nearby to speed up the drying process.

Step 4: Oil-Based Paint - Proceed with Caution

Oil-based paints require a different approach due to their solvent-based nature. * **Ventilation is Key:** Open windows and turn on a fan to ensure good air circulation. Wear gloves and consider a mask if the fumes are strong. * **Test a Small Area:** Before applying any solvent to the stain, test it on an inconspicuous area of the carpet (e.g., inside a closet or under furniture) to ensure it doesn't damage or discolor the carpet. * **Apply Solvent:** Dampen a clean cloth with a small amount of mineral spirits or turpentine. Gently blot the paint stain. You should see the paint begin to break down. * **Blot and Repeat:** Continue blotting with fresh sections of the solvent-dampened cloth. You may need to repeat this process multiple times. * **Rinse:** Once the paint is gone, dampen a clean cloth with water and blot the area to remove any solvent residue. * **Wash with Soap:** Follow up by cleaning the area with the mild dish soap and warm water solution described for water-based paints to remove any remaining oily residue. * **Dry:** Blot with a dry cloth and allow to air dry.

Conquering Dried Paint Stains: A More Challenging Feat

Dried paint on carpet is significantly harder to remove, but not impossible. Patience and the right techniques are crucial.

Step 1: Scrape Away as Much as Possible

Use a dull knife or scraper to gently chip away at the dried paint. Be careful not to snag or pull the carpet fibers.

Step 2: Water-Based Dried Paint Removal

Loosen with Water: Dampen the dried paint stain thoroughly with warm water. Let it sit for several minutes to soften the paint. **Scrape and Blot:** Gently scrape away softened paint and blot with a damp cloth. Repeat this process until you've removed as much as possible. **Dish Soap Solution:** If water alone isn't enough, use the mild dish soap and warm water solution. Apply it to the stain, let it sit for a few minutes, then gently scrub with a soft-bristle brush. Blot and rinse with clean water. **Rubbing Alcohol:** For more stubborn dried water-based paint, rubbing alcohol can be effective. Apply it to a clean cloth and blot the stain. Let it sit for a few minutes before gently scrubbing and rinsing. **Commercial Carpet Cleaner:** If the above methods fail, consider a commercial carpet stain remover specifically designed for paint. Follow the product's instructions carefully.

Step 3: Oil-Based Dried Paint Removal

Ventilation and Testing: As with wet oil-based paint, ensure good ventilation and test any solvent on an inconspicuous area. **Soften with Solvent:** Apply mineral spirits or turpentine to a clean cloth and blot the

dried paint stain. You may need to let the solvent sit on the stain for a longer period (10-15 minutes) to allow it to penetrate and soften the dried paint. * **Scrape and Blot:** Gently scrape away the loosened paint and blot with the solvent-dampened cloth. Repeat as needed. * **Dish Soap and Rinse:** Once the paint is removed, clean the area with the dish soap and warm water solution and rinse thoroughly with clean water. * **Consider Professional Help:** Dried oil-based paint can be very difficult to remove completely without professional cleaning.

Tackling Specific Paint Types and Scenarios

While the general principles apply, some paint types and situations warrant specific attention.

Spray Paint on Carpet

Spray paint is notoriously difficult because of its fine mist and rapid drying. * **Act Immediately:** If the spray paint is wet, blot as much as you can immediately. * **Solvent Power:** For dried spray paint, you'll likely need a strong solvent. Mineral spirits or a dedicated spray paint remover (test first!) might be necessary. Apply sparingly to a cloth and blot. * **Patience is Key:** This is where patience truly pays off. You'll likely be blotting and reapplying solvent many times. * **Professional Cleaning:** In many cases, professional carpet cleaners are the best bet for spray paint stains.

Latex Paint on Carpet - The Common Culprit

Latex paint is the most frequent offender. For wet latex, the dish soap and water method is usually sufficient. For dried latex, try the warm water soak

and gentle scraping, followed by rubbing alcohol if needed.

Fabric Paint and Craft Paints

These can be tricky as they are often designed to adhere well. Similar methods to water-based paints can be tried, but if they are heavily pigmented or have strong binders, rubbing alcohol or a specialized craft paint remover might be more effective. Always test solvents first.

When to Call in the Professionals

There are times when DIY paint removal simply won't cut it, and it's best to enlist the help of professionals.

1. **Large or Deep Stains:** If the spill is extensive or has soaked deep into the carpet padding, professional extraction is often necessary.
2. **Stubborn Oil-Based or Spray Paint Stains:** These can be incredibly difficult to remove completely and may require specialized equipment and chemicals.
3. **Delicate Carpet Materials:** If you have a delicate or expensive carpet (e.g., silk, wool), it's safer to entrust the cleaning to experts to avoid damage.
4. **Fear of Causing More Damage:** If you're hesitant or worried about making the stain worse, a professional carpet cleaner has the knowledge and tools to handle it.
5. **When All Else Fails:** If you've tried multiple DIY methods without success, it's time to call in the pros.

Preventive Measures: The Best

Defense

The easiest way to deal with paint stains on carpet is to prevent them from happening in the first place.

1. **Lay Down Drop Cloths:** Always use adequate drop cloths or plastic sheeting when painting, extending them well beyond the immediate work area.
2. **Wear Protective Footwear:** If you're walking around with painted items, wear old shoes or shoe covers.
3. **Store Paint Cans Securely:** Ensure paint cans are tightly sealed and placed on a stable surface when not in use.
4. **Clean Up Spills Immediately:** Don't let spills sit, even if you plan to deal with them later. The longer paint sits, the harder it is to remove.
5. **Designate Painting Areas:** If possible, conduct painting projects in areas with hard flooring or in a garage.
6. **Educate Household Members:** Make sure everyone in the household understands the importance of careful handling of paint.

Conclusion

Paint spills on carpet are a common household mishap, but with the information and techniques provided in this comprehensive guide, you're well-equipped to tackle them. Remember to identify the paint type, act quickly, use the appropriate cleaning agents, and be patient. For the most stubborn stains or delicate carpets, don't hesitate to call in the professionals. By understanding the nature of paint and employing effective removal strategies, you can restore your carpet to its former glory and prevent future paint-related headaches.

Questions & Answers About how to get paint out of carpet

No	Question	Answer
1	Help! I just spilled a whole can of paint on my carpet. What's the first thing I should do?	Act fast! For wet paint, blot up as much as possible immediately with clean cloths or paper towels. Avoid rubbing, which spreads the paint. For dried paint, scrape away any excess gently with a dull knife or spoon.
2	Is there a difference in treating latex paint vs. oil-based paint spills on carpet?	Yes! For latex (water-based) paint, use dish soap and water. For oil-based paint, you'll need mineral spirits or a paint thinner, applied sparingly to a cloth first.

3	What common household items can I use to remove dried latex paint from my carpet?	Try a paste of baking soda and water, or a solution of equal parts white vinegar and water. Apply, let sit, and gently blot.
4	My toddler had a painting session gone wrong. How do I get craft paint out of the carpet safely?	Craft paints are often water-based. Start with a mild solution of dish soap and warm water. If that doesn't work, a mixture of rubbing alcohol and water can be effective for tougher spots.
5	What's the secret to removing paint splatter without damaging my carpet fibers?	Patience and gentle blotting are key. Always test any cleaning solution on an inconspicuous area of the carpet first. Work from the outside of the stain inward to prevent spreading.
6	I've tried everything, and there's still a faint paint stain. What are my next steps?	Consider a commercial carpet stain remover specifically designed for paint. Follow the product instructions carefully, and again, test in a hidden spot first.
7	My carpet is a light color, and I'm worried about bleaching it while removing paint. Any advice?	Be extra cautious with harsh chemicals. Start with the mildest solutions (dish soap and water). If you need to use something stronger like rubbing alcohol, dilute it and use a white cloth to avoid color transfer.
8	What if the paint has been on the carpet for a while and is completely dried?	Dried paint is tougher. For latex, try hairspray or nail polish remover (acetone-free is safer for carpets) applied to a cloth and blotted. For oil-based, repeat applications of mineral spirits might be necessary, always blotting and rinsing with water afterwards.
