The Foundational Pillars of Manga Drawing According to Crilley

Before you can draw epic battles or heartwarming romances, you need to understand the fundamentals. Crilley is a big proponent of building a solid base, and his teachings consistently circle back to a few key areas. These are the building blocks that will enable you to draw anything and everything in the manga style.

1. The Anatomy of a Manga Character: Head and Face

The face is arguably the most crucial element in conveying emotion and personality in manga. Crilley's tutorials on drawing heads are legendary. He often starts with simple geometric shapes and gradually adds details. Key aspects he emphasizes include:

1. **The Basic Head Shape:** Crilley typically guides viewers through drawing a sphere and then adding a jawline, often using guidelines to place facial features accurately.
2. **Eye Placement and Expression:** Manga eyes are iconic. Crilley breaks down how to draw eyes of different shapes and sizes, and crucially, how to imbue them with a vast range of emotions – from joy and sadness to anger and surprise. This involves understanding the nuances of pupil shape, highlight placement, and the subtle curves of eyelids.
3. **Nose and Mouth:** Often simplified in manga, Crilley shows how to draw these features effectively without overcomplication, ensuring they complement the overall character design.
4. **Hair Styles:** From spiky shonen hair to flowing shojo locks, Crilley provides methods for drawing dynamic and varied hairstyles that add character and movement. He stresses drawing hair in clumps rather than individual strands for a more stylized look.

2. Mastering the Body: Proportions and Posing

Once the head is down, the next step is the body. Crilley's approach to anatomy is pragmatic, focusing on proportions that are typical in manga, which often differ from strict Western anatomical accuracy.

1. **Understanding Proportions:** He often uses the "head-to-body" ratio as a guide. For younger characters, it might be 4-5 heads tall, while for more heroic or mature figures, it can be 7-8 heads tall. This consistency is vital for believable characters.
2. **Gesture Drawing and Flow:** Crilley emphasizes capturing the energy and movement of a pose before focusing on detailed anatomy. This involves quick sketches to get the overall flow and balance of the character.
3. **Simplified Anatomy:** He teaches how to represent muscles and body structure in a stylized way that's consistent with manga aesthetics, using basic shapes to build up limbs and torsos.

4. **Drawing Hands and Feet:** These are often challenging for artists. Crilley offers step-by-step methods for simplifying hands and feet, making them easier to draw consistently.

3. Bringing Your Manga to Life: Shading and Inking

The final polish on a manga drawing comes from effective shading and inking. Crilley's techniques here are essential for creating depth and visual impact.

1. **Basic Shading Techniques:** He explains how to use hatching, cross-hatching, and tone to create form and volume. Understanding light sources is key to applying shading correctly.
2. **Spotting Blacks (or "Screen Tones"):** Manga artists often use black areas (often called "spotting blacks") to add dramatic contrast and depth. Crilley shows how to strategically place these to enhance your drawings.
3. **Line Weight and Inking:** The quality of your lines makes a huge difference. Crilley demonstrates how varying line weight can add emphasis and visual interest to your illustrations, making them pop off the page.

Mark Crilley's Step-by-Step Approach to Specific Manga Elements

Beyond the fundamentals, Crilley's tutorials excel in breaking down the creation of specific manga elements. These are the kinds of tutorials that many artists search for when they want to draw particular types of characters or scenes.

Drawing Manga Eyes: The Window to the Soul

As mentioned, eyes are paramount. Crilley often starts with a basic almond shape, then adds the pupil, iris, and highlights. He emphasizes how the size, shape, and placement of highlights can convey a character's mood and personality. Learning to draw reflective eyes that look alive is a core skill he imparts.

Creating Dynamic Manga Hair

Manga hair is rarely realistic. It's often stylized, energetic, and full of volume. Crilley teaches how to draw hair in clumps and strands that suggest movement and flow, often using simple curves and sharp angles to achieve the desired effect. Whether it's short and spiky or long and flowing, his methods help create believable and expressive hairstyles.

For action-oriented manga, weapons and gadgets are crucial. Crilley breaks down how to design and draw these items, focusing on clear shapes, consistent perspective, and adding details that make them look functional and cool. He often encourages looking at real-world objects for inspiration and then stylizing them.
